

**STONE-SHADE™ Highlighting  
Color Dispersions**

# STONE-SHADE™ Highlighting Color Dispersions

**1. DESCRIPTION:**

**STONE-SHADE™** is a specially formulated blend of solvents, acrylics and proprietary ingredients designed for adding authentic color detail to stamped, textured and acid stained concrete surfaces. **STONE-SHADE™** is available in 17 standard colors and 4 premium colors. Usually, **STONE-SHADE™** is applied to several individual slates, bricks or stones in a stamped concrete project to set them apart from the normally colored areas creating the natural effects of real masonry surfaces. **STONE-SHADE™** can also be used to refurbish old stamped concrete surfaces making them look like new again. **STONE-SHADE™** can also be used after neutralizing acid stain surfaces to alter the final color before sealing.

**2. RECOMMENDED USES:**

- Stamped Concrete Surfaces
- **STENCIL-CRETE®** Overlay Systems
- **VENEER-CRETE™** Resurfacing Systems
- **CHROME-ETCH™** Acid Stain Surfaces

**3. BENEFITS:**

Quick, easy and economical way of adding additional colors to stamped concrete applications.

Non-fading.

Available in 17 standard colors and 4 premium colors.

Easily renovate old, worn stamped concrete jobs.

**4. PACKAGING & COVERAGE:**

**STONE-SHADE™** is available in one &

five gallon units and will cover approximately 250 s.f. per gallon.

**5. DIRECTIONS FOR USE:**

**Surface Preparation**

Powder & Liquid Release Agents must be removed from stamped concrete surfaces before applying **STONE-SHADE™**. All **VENEER-CRETE™** or **STENCIL-CRETE®** surfaces must have reached initial set and be completely dry. All acid stained surfaces must be properly neutralized before shading. All concrete surfaces must be at least 45 degrees F. before applying **STONE-SHADE™**.

Mix **STONE-SHADE™** well before application. Apply **STONE-SHADE™** with a pump up sprayer, brush or roller directly to the surface. Up to three coats can be applied until the desired color effect is achieved. After the **STONE-SHADE™** is completely dry and tack free, two coats of **CHROME-SEAL™** Clear Sealer is recommended.

Slate, Terra Cotta and Charcoal **STONE-SHADE™** highlight this Ashlar Slate stamped concrete application.

Fire Engine Red

Pine Green
